Preparing for Multiple Mini Interviews (MMI)

The Multiple Mini Interview (MMI) is an increasingly popular screening method used to select candidates for admission to educational programs in the regulated professions, most commonly within the health professions – e.g., medicine, pharmacy, occupational therapy. The format requires candidates to participate in a series of short, structured interview stations that are used to assess personal qualities, skills and knowledge. Typically there are 8 to 12 stations. Depending on the program and school, the questions may or may not relate to health care topics.

### Station Type and Skill Evaluation

| Communication/Role Play    | Your company needs both you and a co-worker (Sara, a colleague from another branch of the company) to attend a critical business meeting in San Diego. You arrive at Sara’s office to drive her to the airport. Sara is in the room. | • Communicate clearly demonstrating tact, professionalism, empathy, self-awareness and insight.  
• Demonstrate integrity and respect for diversity. |
| Health Care Knowledge      | Compare the Canadian and US healthcare system addressing advantages and disadvantages of privatized health care. | • Demonstrate knowledge of health care related concerns, trends and policies as well as the role of the health professional. |
| Critical thinking          | Universities strive to balance the educational needs of their students and the costs required to service a large number of individuals. One side argues that smaller classes are more effective, while others argue that it makes no difference, and larger classes should be used to minimize costs. Discuss your opinion. | • Clearly articulate all sides of an issue.  
• Think critically and solve problems.  
• Identify all implications and stakeholders. |
| Ethical decision making    | Dr Smith recommends homeopathic medicines to his patients. However, he does not believe that they work, as there is no scientific evidence to support their usage. He recommends them to patients with fatigue or headaches because he believes that it will do no harm and provide them reassurance. Discuss the ethical problems that Dr Smith’s behaviour might pose. | • Clearly articulate all sides of an issue.  
• Make decisions while examining an issue/dilemma from multiple perspectives.  
• Demonstrate knowledge of health related issues and professional codes of conduct when appropriate. |
| Collaboration              | Review an illustration and verbally guide your colleague to complete a paper folding project. (Your colleague cannot see you). You have 5 minutes to complete the project followed by 3 minutes to discuss any difficulties that arise. | • Work as member of a team (interpersonal skills) to complete a task.  
• Follow instructions (listening skills).  
• Provide detailed instructions. |
| Writing                    | Write a paragraph about your response/reaction to a quotation. | • Demonstrate academic writing and communicate in a professional manner. |
Preparing for Multiple Mini Interviews (MMI)

Interview Process

Candidates are given 2 minutes to read the question or scenario posted outside the station door and mentally prepare a response before entering the interview room. Upon entering the station, the candidate will have approximately 6 to 8 minutes to respond to the question. The candidate will receive a signal (a buzzer may sound) that it is time to move to the next station.

Some of the scenarios may involve debating a topic, role playing with an actor or working as part of a team to complete a task. The reverse side lists some example categories. It is not intended to be a comprehensive list.

General Interview Strategies

• After reviewing the question, try to identify why you are being asked this question. What do you think the interviewer is trying to evaluate?
• When entering each station, pause to introduce yourself (unless instructed otherwise), smile, and consider your body language.
• Summarize or rephrase the question before responding.
• Structure your response so that the interviewer has an idea of what you will be discussing.
• Pace yourself.
• Articulate your thinking process as it is helpful for the interviewer to hear how you arrived at your conclusion and demonstrate that you fully considered all of the information, stakeholders and implications.
• Connect your response to professional codes of conduct when appropriate.
• Relate your response to your personal/professional experiences when appropriate.
• Conclude by summarizing and highlighting your main points.
• Practice, practice, practice.

Next Steps & Additional Resources

• Contact the Academic Advising & Career Centre to register for a Mock MMI session.
• Meet with a Career Counsellor to practice different types of questions.
• Review the professional code of conduct for the appropriate profession by visiting the professional association/regulatory body website (ex. Ontario College of Physicians and Surgeons website).
• Read Doing Right: A Practical Guide to Ethics for Medical Trainees and Physicians by Philip C. Hebert.
• Visit online student forums such as Premed 101 or student doctor network.
• Conduct research on the school and program to help you identify what to expect.
