Evolutionary Anthropology HBSc (Specialist) (Major) (Minor)
Department of Anthropology

Anthropology is the study of humankind, dealing with the origin, development and nature of humans and their culture. The Major program in Evolutionary Anthropology provides a course structure for students desiring to expand upon or supplement other areas of academic interest by taking advantage of Anthropology's unique global, chronological, and biological perspective on the human condition. In the Evolutionary Anthropology Stream (BSc), students understand how humans are related to non-hominid primates, changes in human behaviour and physiology, and what has influenced our transformation into *Homo sapiens sapiens*.

Complementary Programs: Biology, Human Biology, Psychology, Mental Health Studies, Health Studies, Certificate in Bioarchaeology, etc.

Make the most of your time at UTSC!
We want to help you maximize your university experience, so we've pulled together information and suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are listed. In fact, activities such as joining a student club, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study.
