Mental Health Studies (HBSc)

Department of Psychology

Mental Health Studies is a sub-discipline in the field of Psychology that examines psychological well-being and mental disorders. This program focuses on processes relevant to abnormal thought, feelings and behaviour. The program seeks to understand the causes of mental disorders from the level of the brain to the impact on everyday life. Students in this program are often interested in moving into careers in the mental health field. The program aims to provide preparation for students in fields such as clinical psychology, psychiatry or psychiatric social work. Programs in Psychology and Mental Health Studies cannot be combined.

Complementary Programs: Neuroscience, Health Studies, Human Biology, Sociology, Anthropology, Linguistics.

Make the most of your time at UTSC!

We want to help you maximize your university experience, so we've pulled together information and suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are listed. In fact, activities such as joining a student club, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study.

Check out future career opportunities and skills acquired from completing this program:
