

# EESD15H3 - CLEANING UP OUR MESS: REMEDIATION OF TERRESTRIAL AND AQUATIC ENVIRONMENTS

## 2013-14

**Instructor:** Dr. Silvija Stefanovic

**Office:** SW648

**Email:** silvija.stefanovic@utoronto.ca

**Dr. Stefanovic office hours:** Tuesday 2-3pm and Wednesday 10 -11am

**LECTURE:** Fridays from 12-3pm in room BV260 (schedule of topics & readings on pg 2)

### **COURSE DESCRIPTION**

This course consists of a study of the ways in which hazardous organic and inorganic materials can be removed or attenuated in natural systems. The theory behind various technologies, with an emphasis on bioremediation techniques and their success in practice. An introduction to the unique challenges associated with the remediation of surface and ground water environments, soils, marine systems, and contaminated sediments.

### **COURSE PREREQUISITES**

Students must have successfully completed BGYA01H & BGYA02H & CHMA10H & CHMA11H & PHYA10H or PHYA11H

### **TEXTBOOK**

"Fundamentals of Site Remediation" by John Pichtel, 2007, The Scarecrow Press, Inc.  
This text is available from the UT Scarborough bookstore.

### **GRADE BREAKDOWN:**

Presentation (Types of contaminants):	10%
Term assignments (2)	5% (2x2.5%)
Final Project (Case study):	25%
Project presentation	10%
Final Examination:	50%

### **LECTURE NOTES**

The lecture slides will be posted in \*.pdf format on the Blackboard. You will require Adobe Reader to open the files (available free of charge at [www.adobe.com](http://www.adobe.com)).

### **FINAL EXAM**

The final exam will draw from lectures and student's presentations and includes lecture notes and *any* material presented in the classroom. Information from the textbook and other resources not directly covered in class will not be tested on exams. More details about the exams will follow.

### **COURSE EMAIL POLICY**

Email is not an effective way of teaching and email inquiries regarding course materials will not be answered. You are strongly encouraged to regularly attend my office hours. Also you can send me an email and we will set up a time on your and my convenience to discuss any question you have.

## LECTURE SCHEDULE

Date	Topic	Associated Readings in Textbook
September 6 <sup>th</sup>	Course orientation Introduction to Soil and Groundwater Remediation	Lecture notes
September 13 <sup>st</sup>	Basic Soil and Groundwater Properties (review)	Lecture notes Chapter 1&4
September 20 <sup>th</sup>	Environmental Site Assessment; Investigative methods; Natural attenuation.	Lecture notes Chapter 5
September 27 <sup>th</sup>	Student's presentations (Types of Contaminants)	Handouts Chapter 2&3
October 4 <sup>th</sup>	Student's presentations (Types of Contaminants)	Handouts Chapter 2&3
October 11 <sup>th</sup>	<i>Groundwater Remediation:</i> <b>Physical Methods; Ex-Situ Technologies;</b> <b>In-Situ Technologies.</b> Case Histories	Lecture notes Chapter 6&10
October 18 <sup>th</sup>	Reading Week, No Classes	
October 25 <sup>th</sup>	<i>Groundwater Remediation:</i> <b>DNAPLs Remediation Methods; LNAPLs Remediation Methods.</b> <i>Surface Water and Marine Systems Remediation:</i> <b>Oil spills Remediation Methods</b> Case Histories	Lecture notes
November 1 <sup>st</sup>	<i>Soil and Sediments Remediation:</i> <b>Phytoremediation; In-situ and Ex-situ Thermal Treatments.</b> Case Histories	Lecture notes Chapter 12
November 8 <sup>th</sup>	<i>Soil and Sediments Remediation:</i> <b>Chemical and Biological Remediation; Solidification and Stabilization</b> Case Histories	Lecture notes Chapter 8&11
November 15 <sup>th</sup>	<i>Soil and Sediments Remediation:</i> <b>Soil Vapor Extraction; Soil Washing and Solvent Extraction.</b> Case Histories	Lecture notes Chapter 7&9
November 22 <sup>h</sup>	Student's presentations (Case studies)	
November 29 <sup>th</sup>	Student's presentations (Case studies) Final Review	

*I will follow this schedule as closely as possible, but things being what they are, some of these topics may "overflow" over into other time slots.*
