

PHYC50H

Electromagnetic Theory

Prof. Julian Lowman
Office: SW-506H
phone: 416 2084880
lowman@utsc.utoronto.ca

COURSE DESCRIPTION:

Solving Poisson and Laplace equations via method of images and separation of variables, multipole expansion for electrostatics, atomic dipoles and polarizability, polarization in dielectrics, Ampere and Biot-Savart laws, multipole expansion in magnetostatics, magnetic dipoles, magnetization in matter, Maxwells equations in matter.

LECTURES:

Mondays 3pm-4pm in SW309 and Wednesdays 10am-11am in room MW262.

TUTORIALS:

Tutorials are 50 minutes in duration, and will be held every Tuesday starting at 1710 from Week 2. Tutorials will be held in room AA209.

Tutorial attendance is expected. In addition to problem solving examples that will support the lecture material, tutorials will feature quizzes that contribute to the final grade.

TEXTBOOK: D. J. Griffiths, *Introduction to Electrodynamics*, 4th/3rd editions (Prentice Hall).

References:

Edward M. Purcell, *Electricity and Magnetism*, Second Edition (McGraw-Hill) (different approach than Griffiths);

H.M. Schey, *Div, Grad, Curl and All That*, (Norton) (covers vector calculus in the context of electromagnetism);

M.R. Spiegel, *Schaum's Outline Series Theory and Problems of Advanced Calculus*, (McGraw-Hill).

E-Mail: I will only respond to e-mails sent from a recognized University of Toronto address. Please put PHYC50 in the subject line of any course-related e-mails. I will endeavour to reply as quickly as possible to your e-mails. However, I cannot promise that I will do so outside of normal working hours (Monday-Friday 9-5). Please include your name and student number in any communications. I will not respond to emails if I cannot tell who they are from. Please also note that I will NOT accept assignments via e-mail.

OFFICE HOURS:

I will be available to answer questions on a drop in basis on Wednesdays between 11:30 and 12:30 in Room SW506H. If you are unable to attend these hours for timetable reasons you may arrange an appointment by e-mail. General questions regarding the lecture material will also be addressed in the Tuesday tutorial.

LECTURE SCHEDULE

SEPTEMBER 3

Laplace's equation in 1, 2 and 3D (3.1.1-3.1.4)

SEPTEMBER 8 and SEPTEMBER 10

Boundary Conditions, Uniqueness and Method of Images (3.1.5-3.2.3)

Separation of Variables (Cartesian) (3.3.1)

SEPTEMBER 15 and SEPTEMBER 17

Separation of Variables (Spherical) (3.3.2)

Multipole Expansions (3.4.1-3.4.2)

SEPTEMBER 22 and SEPTEMBER 24

Electric Field of a Dipole (3.4.2-3.4.4)

Polarization, Dielectrics(4.1.1-4.2.1)

SEPTEMBER 29 and OCTOBER 1

Bound Charges (4.2.1-4.2.2)

The Electric Displacement (4.2.3-4.4.1)

OCTOBER 6 and OCTOBER 8

Linear Dielectrics (4.2.3-4.4.1)

Boundary Value Problems (4.4.2-4.4.3)

OCTOBER 13 and OCTOBER 15

Thanksgiving

Study Break

OCTOBER 20 and OCTOBER 22
Energy and Forces (4.4.4)
Multipole Expansion of the Magnetic Vector Potential (5.4.3)

OCTOBER 27 and OCTOBER 29
Torques and Forces on Magnetic Dipoles (6.1.1-6.1.2,6.1.4)
Bound Currents (6.2.1-6.2.3)

NOVEMBER 3 and NOVEMBER 5
Ampere's Law in Magnetized Materials (6.3.1-6.3.3)
Linear and non-Linear Media (6.4.1-6.4.2)

NOVEMBER 10 and NOVEMBER 12
Electromotive Force and Induction (7.1.1-7.2.3)
Inductance and Maxwell's Equations (7.2.3-7.3.6)

NOVEMBER 17 and NOVEMBER 19
Charge and Energy, Poynting's Theorem (8.1.1-8.1.2)
Momentum, Maxwell's Stress Tensor (8.1.2-8.2.2)

NOVEMBER 24 and NOVEMBER 26
Angular Momentum (8.2.3-8.2.4)
Additional Material and Review Problems

ASSESSMENT:

A COMPREHENSIVE FINAL EXAM (3 hrs): 50%

MIDTERM TEST (90 minutes): 22%

4 ASSIGNMENTS (tutorial and take home work): 16% in total

3 TUTORIAL PRACTICALS/QUIZZES: 12% in total

TESTS AND EXAM:

Both the midterm and final exam will draw from lecture and tutorial materials. This could include material presented in the lectures or tutorial material that is not covered in the text. The chapters from the text that *support* the lecture material presented each week are indicated in the schedule above.

The Mid-Term test will cover the subject matter covered in weeks 1-6.

The final exam will cover all material.

NOTES:

Due dates and times will appear on the assignment handouts. Late assignments will be penalized by 50% per day. Assignments must be handed in at the tutorial on the day they are due. Assignments handed in later on the same day will be considered 1 day late. Each 24 hour period following from the end of the tutorial time slot is considered a day. Assignments that are more than one day late will not be accepted.

I expect that, in the course of doing your assignments, you will discuss them with your classmates at some level. This is fine, and a normal part of the study process. What you must not do, is copy another student's work. It is fine to discuss the problems, but when it comes to actually writing out your solutions you should do this by yourself. To copy answers from someone else is an academic offense. Plagiarism will not be tolerated. Students are expected to submit their own work for grading. Should you choose to disregard this advice, be aware that academic offenses will be turned over to the university for the determination of an appropriate penalty. I will not enjoy the process anymore than you so please don't put it to the test.

For all graded problems, in addition to any mathematical work, I expect clear written statements at each stage in the solution. Full marks will not be awarded without this. Another problem that sometimes arises is that of legibility. It takes a lot of time and effort to grade problem sets and it is very frustrating for the marker if assignments are messy and difficult to read. You will likely be more successful on your problem sets if you do what you can to not frustrate the marker. Please put some effort into ensuring that your work is clearly written. And please staple the pages of your assignments together.
