

Bio-Organic Chemistry CHMC47 2017 Course Outline

This document contains important information and should be kept in a safe place where you can refer to it throughout the semester.

Welcome to the CHMC47H3: Bio-Organic Chemistry. This course studies the chemistry of heterocycles, nucleic acids, terpenes, steroids and other natural products; amino acids, proteins and carbohydrates; introduction to enzyme structure and catalysis; an also introduction to the chemistry of drugs.

LEC01: Fri 9:00-11:00 SW128 and TU 17:00-18:00 SW143

Labs: Mo 9:00-13:00, EV112,113,114,122; Thur. 9:00-13:00, EV112,113,114. Please note that labs will be running every week. First lab will be on Monday, September 11th.

Lecturer and Lab Coordinator: Dr. Lana Mikhaylichenko

Contact: mikhay@utsc.utoronto.ca

(416) 287-7207, EV556 or EV107 (during the lab)

Office hours: Tue. 3:00 – 4:00 pm, Fri.2:00 – 3:00 pm (EV556 or one of the meeting's room on a fifth floor) and during the labs (if not busy)

Required Text Books:

P.Y. Bruice, Organic Chemistry with Study Guide and Solution Manual. 8th ed., Pearson.

P.Y. Bruice, *Study Guide and Solutions to Organic Chemistry*, 8th ed., Pearson

(You can also use 5th, 6th or 7th edition of the book and Study Guide)

Recommended Websites:

Please check the External links section on the course Blackboard page.

Method of Evaluation:

Labs: 30% (you must pass the lab component in order to receive a final grade in this course)

Literature Assignment: 8% (the assignment will be given during your second lab)

Midterm Test: 15%

Oral Group Presentation: 5% (location and time TBA)

Learning Catalytic participation mark: 2%

Final Exam: 40% (December exam period)

Course Website: course site on Blackboard

Communication: via email and office hours

Discussion Sessions:

The discussion sessions for this class will be organized after our first lecture. I will try to find out what time and day will work for the majority of our class. This is your time to ask questions that you were not able to ask during the lecture and work together on course related problems.

Learning Outcomes for Course:

By the end of this course, students will be able to:

- Identify, classify and name carbohydrates, amino acids, nucleic acids, and other biochemical compounds.
- Understand the principles of the chemistry connected to living systems. The principles of biosynthesis and metabolism of compounds such as: steroids, lipids, amino acids, peptides, proteins, vitamins, carbohydrates and nucleic acids.
- Use the vocabulary on organic chemicals and reactions in metabolism and other biochemical applications.
- Explain the role of enzymes in metabolism.
- Become more familiar with the modern organic techniques such as chromatography (TLC and column), separation methods (extraction, recrystallization, etc) and methods such as UV, IR, ^1H NMR, GC, HPLC spectroscopy, etc.

Lecture Schedule: This is a rough guide only and may change throughout the term.

Lec #	Week of	Subject	Bruice book 8 th ed.	Bruice book 7 th ed.
1	Sept 5	Carbohydrates	Ch 20	Ch 21
2	Sept 11	Carbohydrates Amino Acids	Ch 20 Ch 21	Ch 21 Ch 22
3	Sept 18	Amino Acids, Peptides, and Proteins	Ch 21	Ch 22
4	Sept 19	Lipids/Terpenes	Ch 25	Ch 16; 25
5	Sept 25	Heterocyclic Compounds	Ch 19	Ch 20
6	Oct 2	Nucleic Acids	Ch 26	Ch 26
Reading week – week of October 9th (no classes)				
Midterm – date and location TBA				
7	Oct 16	Catalysis	Ch 22	Ch 23
8	Oct 23	The Organic Mechanisms of the Coenzymes	Ch 23	Ch 24
9	Oct 30	The Organic Mechanisms of the Coenzymes	Ch 23	Ch 24
10	Nov 6	The Chemistry of Metabolism	Ch 24	Ch 25
11	Nov 13	The Chemistry of Metabolism The Organic Chemistry of Drugs: Discovery and Design	Ch 24 Ch 31(posted on a course BB page)	Ch 25 Ch 31(posted on a course BB page)
12	Nov 20	The Organic Chemistry of Drugs: Discovery and Design	Ch 31(posted on a course BB page)	Ch 31(posted on a course BB page)
Fall Term Exams	Dec 7 - 20	Tree hour term test (TBA).		

Assigned problems will be posted with the every lecture material.

Lab Manual for this course will be sold through UTSC Chemistry Club (dates and location TBA). The introductory part of the Lab Manual has a tentative lab schedule and all the information you need to know about these labs. Please read it before coming to the actual labs. All information about upcoming lab will be also posted on course Blackboard page in Lab Schedule section.

Oral Presentations

Literature assignment which also contains topics for oral presentations will be given to you during second lab period. The location and time for your presentations will be posted later on a Blackboard course page. Please check the Blackboard for the detailed explanation about this presentation. Do not worry – historically students do not like the idea about oral presentation at the beginning but really enjoy this experience at the end.

Literature assignment

The detailed explanation of my expectations for the good literature assignment will be posted on a course Blackboard page. We are going to use **peerScholar** program for the essay part of your literature assignment. Detailed instructions of how to use this program will be posted on a course Blackboard page.

We will also have a guest lecturer who will let you know about UTSC writing centre and all the help available there. You will submit your literature assignment through **Turnitin** program. This is a U of T statement about this program:

"Normally, students will be required to submit their course essays to Turnitin.com for a review of textual similarity and detection of possible Plagiarism. In doing so, students will allow their essays to be included as source documents in the Turnitin.com reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of the Turnitin.com service are described on the Turnitin.com web site".

I will post a detailed explanation of how to submit your assignment later on a course page. Link to Turnitin program will be also posted in External Links section on a course Blackboard page.

Study Hints:

Organic chemistry is a cumulative subject. As such, an understanding of new material depends on mastery of topics discussed in previous chapters, including that which was taught in Organic Chemistry I and II. I will remind you which chapter you need to review if you do not remember it well. **Keep up with the material –do not let yourself get behind!!!**

Class notes:

Sets of *incomplete notes*, will be available on the class Blackboard page prior to the corresponding lecture. You are responsible for printing these notes and bringing them

with you to class. **You will be responsible for all material covered in lecture, even if it is not included in the online notes;** you must attend lecture in order to get additional information. I will also post set of all class notes at the end of each week for some of you who missed lecture for different reasons.

Steps toward Success in Bio-Organic Chemistry:

- 1. Look through the chapter before lecture.** It is not necessary to read the whole chapter before class, but look at headings and schemes, specifically trying to find similarities to topics that you already know. Much of organic chemistry follows the same trends, and identifying common themes will make studying and leaning the material much easier.
- 2. Go to class.** Go to class every time and pay attention during class.
- 3. Do practice problems!** This is the most important and most productive way to study and ESSENTIAL to you success in the class. Work as many problems as you can, but realize that reading the solution manual is not the same as solving a problem on your own. If you have a difficult time with the problem, it will be much more beneficial to you if you reread the appropriate section of the textbook (and online text if you need additional explanations) than if you simply read the answer.
- 4. Ask questions!** Attend office hours and discussion sessions.

Accessibility:

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, please feel free to approach me and/or the *AccessAbility* Services Office as soon as possible. I will work with you and *AccessAbility* Services to ensure you can achieve your learning goals in this course. Enquiries are confidential. The UTSC *AccessAbility* Services staff (located in SW302) are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations (416)287-7560 or ability@utsc.utoronto.ca.

ACADEMIC INTEGRITY STATEMENT

Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student's individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto's Code of Behavior on Academic Matters (<http://www.governingcouncil.utoronto.ca/policies/behaveac.htm>) outlines the behaviors that constitute academic dishonesty and the processes for addressing academic offences. Potential offences include, but are not limited to:

IN PAPERS AND ASSIGNMENTS: Using someone else's ideas or words without appropriate acknowledgement. Submitting your own work in more than one course without the permission of the instructor. Making up sources or facts. Obtaining or providing unauthorized assistance on any assignment.

ON TESTS AND EXAMS: Using or possessing unauthorized aids. Looking at someone else's answers during an exam or test. Misrepresenting your identity. **IN ACADEMIC**

WORK: Falsifying institutional documents or grades. Falsifying or altering any documentation required by the University, including (but not limited to) doctor's notes. All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behavior on Academic Matters. If you have questions or concerns about what constitutes appropriate academic behavior or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from other institutional resources (see http://www.utoronto.ca/academicintegrity/resourcesfor_students.html).

Please also note this:

The Department of Physical and Environmental Sciences at UTSC provides state-of-the-art education in chemistry. Chemistry being an experimental science makes learning in a laboratory setting critical. In order to provide the latest technology to enhance the student learning experience, UTSC will be charging ancillary fees for all chemistry courses that have a laboratory component. Those fees are used to recover the cost of materials and services used during the lab and to maintain and upgrade the equipment used by students. To view a complete list of those fees, students are encouraged to visit the following link:

[http://www.planningandbudget.utoronto.ca/Assets/Academic+Operations+Digital+Assets/Planning+\\$126+Budget/2012-13+Category+5+Ancillary+Fees.pdf](http://www.planningandbudget.utoronto.ca/Assets/Academic+Operations+Digital+Assets/Planning+$126+Budget/2012-13+Category+5+Ancillary+Fees.pdf)

I am looking forward to see you all and work with you!

P.S. This picture was made for fun using ChemDraw program but it is very useful tool in organic chemistry labs. Please download it through U of T library website. It is free for U of T students and you will be using it a lot during this course. Your literature assignment must have all structures and reaction mechanisms done using this program.
