

**"HUMAN HEALTH AND THE ENVIRONMENT"**  
**(EESA10 H3 S)**

**Instructor:** Dr. Silvija Stefanovic

**Office:** SW-410

**Lecture:** Wednesday 7-9 pm, AC-223

**Email:** [silvija.stefanovic@utoronto.ca](mailto:silvija.stefanovic@utoronto.ca)

**Phone:** 416-287-5602

**Office hours:** Wednesday 5-7 pm

**T.A.s:** Yvonne Henry  
Laura Hill  
Yue Qiao  
Richard Siewierski

**Office:** SW-507A

**Office hours:** TBA (on the Intranet soon)

**Textbook:** Life support: The environment and human health. Michael McCally, MIT press, Cambridge 2002 (also available on line – **see library catalogue** and on short term loan in the library).

<b>Grading:</b>	Assignments (2):	20%
	Mid-term Examination:	20%
	Final Examination:	60%

**Intent of the course:**

Because of pollution, our surroundings are becoming increasingly hazardous to our health. The past century has seen intense industrialization characterized by the widespread production and use of chemicals and the intentional and unintentional disposal of a wide range of waste materials. This course explores the relationship between the incidence of disease in human populations and the environmental pollution. Emphasis will be placed on understanding where and what pollutants are produced, how they are taken up by humans and their long term effects on health; the role of naturally-occurring carcinogens will also be examined. The course will include a view of risk assessment and toxicology using case studies. No prior knowledge of environmental or medical science is required.

**LECTURE TOPICS**

1. Introduction, ground rules, expectations and course structure.  
Understanding the Health Effects of Environmental Hazards  
**Video:** "Everyday carcinogens: Acting for Prevention in the Face of Scientific Uncertainty" Featured by Dr. Sandra Steingraber
2. Airborne Hazards and Human Health

Jan 7<sup>th</sup>

Jan 14<sup>th</sup>

3. Assignment #1 discussion; Waterborne Hazards and Human Health	Jan 21 <sup>st</sup>
4. Chemical Hazards and Human Health <b>Video:</b> Body Burden	Jan 28 <sup>th</sup>
5. Heavy Metals and Human Health. <b>Case study:</b> CCA (Chromated Copper Arsenate) wood preservative	Feb 4 <sup>th</sup>
6. Radiation and Electromagnetic Hazards and Human Health	Feb 11 <sup>th</sup>
<b>7. READING WEEK</b>	Feb 18 <sup>th</sup>
8. Biological Hazards and Human Health <b>Video:</b> Black Dawn: The Next Pandemic	Feb 25 <sup>th</sup>
9. Foodborne Hazards and Human Health <b>Video:</b> Diet and Disease in Modern Society	Mar 4 <sup>th</sup>
10. Assignment #2 discussion; Toxicology, the Science of Risk Assessment, Precautionary Principle	Mar 11 <sup>th</sup>
11. Environmental Hazards to Specific Populations: Children, Women, Occupational Hazards; Growing Population, Overconsumption, War and Human Health	Mar 18 <sup>th</sup>
12. Climate change, Ozone depletion, Species Loss and Ecosystem Disruption and Human Health.	Mar 25 <sup>th</sup>
<b>13. Final Exam Preparation</b>	Apr 1 <sup>st</sup>

*I will follow this schedule as closely as possible, but things being what they are, some of these topics may "overflow" over into other time slots.*

### ***ASSOCIATED READINGS IN TEXTBOOK***

- Week 1 - Lec 1- Chapter 1(pp 1-6, pp 10-12)
- Week 2 - Lec 2- Chapter 2
- Week 3 - Lec 3- Chapter 3
- Week 4 - Lec 4- Chapters 9, 10
- Week 5 - Lec 5- Chapter 4
- Week 6 - Lec 6- Chapter 12
- Week 7- READING WEEK
- Week 8 -- Lec 7- lecture notes only
- Week 9 - Lec 8-lecture notes only
- Week 10 - Lec 9- Chapters 13, 14
- Week 11- Lec 10- Chapters 5, 15, 16
- Week 12 - Lec 11- Chapters 6, 7, 8

**Suggested studying strategy:** I would suggest you to read the suggested chapter before the class but just briefly, do not spend too much time. Then see the lecture and take the notes during the lecture since everything I say, not just what is written on the slides, is for the exams. Then read the chapter again but now more carefully since you know now on what parts to focus on, based on my lecture. This strategy is time consuming but for sure successful.  
It is important to read the textbook.

More emphasizes will be put on the lecture notes but still some of the questions will be from the text.

## LECTURE NOTES

The lecture slides will be posted in \*.pdf format on the Intranet. You will require Adobe Reader to open the files (available free of charge at [www.adobe.com](http://www.adobe.com)).

## LECTURE ONLINE

Link for online lectures will be posted on the Intranet soon. Both sections online and live will have an access to online lectures.

I am not responsible for recording and posting lectures online so if you have any question or experience technical difficulties please contact professor **Steve Joordens** at [joordens@utsc.utoronto.ca](mailto:joordens@utsc.utoronto.ca)

## ASSIGNMENTS

There are no tutorials in this course. TAs will hold office hours to help with assignments. See the Intranet to find out who is your TA. I would suggest you to attend office hours of your TA (*always the same TA*) regularly since she/he will mark your assignments. If you have conflict you can see another TA but you have to submit the assignment to your, designated, TA. Students are encouraged to actively consult with the TA regarding any problems or questions about the preparation of the assignment.

You will have two assignments during the term, worth 20% of the final grade (10% each). **You will be able to access the problem sheets on the Intranet at the times detailed below.** Completed exercises must be placed in the box of appropriate TA, outside SW-624, by 5 pm on the dates shown. TAs will mark the assignments. More details on the assignments will be circulated during the term.

	On the Intranet	Submission Due
Assignment #1 (Related with Lecture 1-5)	Jan. 19 <sup>th</sup>	Feb. 9 <sup>th</sup> , 5pm sharply
Assignment #2 (Related with Lecture 6-11)	Mar. 9 <sup>th</sup>	Mar. 30 <sup>th</sup> , 5pm sharply

You should use a word processor for your written responses. Your document should conform to the following: 25.4 mm margins, single-spaced, 12-point print size. The document must bear a name, student number, date and TAs name. Calculations may be handwritten.

### PLEASE NOTE:

1) Plagiarism will not be tolerated. Students are expected to submit **individual work** for grading. It is an academic offense to plagiarize and those who do, will be subjected to University procedures (see the calendar). Feel free to discuss the assignments with your classmates, but be sure to write the assignments using your own individual words and ideas.

2) Late assignments will not be accepted and assigned a grade of zero.

***Extensions will be granted ONLY with medical note or under exceptional circumstances. Your TA must be informed about that immediately or within maximum 10 days after the assignment due date.***

## **EXAMS**

Both the midterm and final exam will draw from lectures and assignments and includes lecture notes and *any* material presented in the classroom (**VIDEOS ARE FOR THE EXAMS**). Information from the textbook and other resources not directly covered in class or in the assignments will not be tested on exams. Only the numbers, dates and names that I present in the class are for the exams.

### *MID-TERM EXAMINATION*

The 2-hour mid-term examination will be held during the mid-term period, exact time, date and rooms TBA. The exam will consist of multiple-choice and true-false questions and will be worth 20% of the final grade.

### *FINAL EXAMINATION*

The 3-hour final examination will be held during the final examination period. The exam is worth 60% of the final grade for the course. It will be a combination of multiple choice, and true-false questions. **Final exam is cumulative.**

## **Ground Rules**

**1. Check INTRANET regularly.**

**ALL ANOUNSMENTS, LECTURE NOTES, ASSIGNMENTS, AND ALL OTHER INFORMATION WILL BE POSTED ON THE INTRANET.**

**2. In a large enrolment (300+) course like this, the quality of your learning experience depends not only on me (the instructor), but also on you (the students).**

**3. I can only do my best if I have your full and undivided attention for the whole class. Things which will rob me of that attention are:**

a. Late (noisy, disruptive) arrivals. This is a particular “hot-button” for me as you may well find out. This also applies to arrival back for the second hour of class.

b. Cellphones ringing. I do not care who the call is from; you will **not** take it in class. Please switch off all pagers and cells before coming into class; even those that are in backpacks.

c. Chattering and sharing particularly interesting newspaper ads with your chums. It is a complete mystery to me why anyone would spend all kinds of money on a class, and then futz about rather than trying their best to follow the material. That kind of stuff happening in class will force me to deal with it, and will also interrupt the flow of the class, most particularly for the people sitting close to the perpetrator(s).

d. Behaviour that might have been acceptable (and which probably should not have been) in small high school classes is not acceptable in the University context. The level of demand in this class is sufficiently high that nothing less than your best effort will be adequate. You have only 24 hours of class contact time with me; every minute counts. I have a mass of fundamentally important ideas to communicate to you; we have to work hard together at it to succeed.

4. I do not mind questions in class if they can be answered quickly. If they cannot, I will defer answering them until the time between the two class hours, until after class or office hours.

5. I believe that the things that I am going to teach you are of surpassing importance. I have a passion for this material and very much want to transmit that to you. All the above is simply an attempt to make the process easier and more enriching.

6. If for any reason you don't want to talk to me directly, the TAs will also be available for consultation.
