

PHYC50H

Electromagnetic Theory

Prof. Julian Lowman
Office: EV-344
phone: 416 2084880
lowman@utsc.utoronto.ca

COURSE DESCRIPTION:

Solving Poisson and Laplace equations via method of images and separation of variables, multipole expansion for electrostatics, atomic dipoles and polarizability, polarization in dielectrics, Ampere and Biot-Savart laws, multipole expansion in magnetostatics, magnetic dipoles, magnetization in matter, Maxwells equations in matter.

LECTURES:

Mondays 3pm-4pm in room BV361 and Wednesdays 10am-11am in room AC332.

TUTORIALS:

Tutorials are 50 minutes in duration, and will be held every Tuesday starting at 1710 from September 11th. Tutorials will be held in room HL008.

Tutorial attendance is expected. In addition to problem solving examples that will support the lecture material, tutorials will feature quizzes that contribute to the final grade.

TEXTBOOK: D. J. Griffiths, *Introduction to Electrodynamics*, 4th edition (Prentice Hall).

References:

Edward M. Purcell, *Electricity and Magnetism*, Second Edition (McGraw-Hill) (different approach than Griffiths);

H.M. Schey, *Div, Grad, Curl and All That*, (Norton) (covers vector calculus in the context of electromagnetism);

M.R. Spiegel, *Schaum's Outline Series Theory and Problems of Advanced Calculus*, (McGraw-Hill).

E-Mail: I will only respond to e-mails sent from a recognized University of Toronto address. Please put PHYC50 in the subject line of any course-related e-mails. I will endeavour to reply as quickly as possible to your e-mails. However, I cannot promise that I will do so outside of normal working hours (Monday-Friday 9-5). Please include your name and student number in any communications. I will not respond to emails if I cannot tell who they are from. Please also note that I will NOT accept assignments via e-mail.

OFFICE HOURS:

I will be available to answer questions on a drop in basis on Wednesdays between 11:30 and 12:30 in Room EV344. If you are unable to attend these hours for timetable reasons you may arrange an appointment by e-mail. General questions regarding the lecture material will also be addressed in the Tuesday tutorial.

LECTURE SCHEDULE

SEPTEMBER 5

Laplace's equation in 1, 2 and 3D (3.1.1-3.1.4)

SEPTEMBER 10 and SEPTEMBER 12

Boundary Conditions, Uniqueness and Method of Images (3.1.5-3.2.3)

Separation of Variables (Cartesian) (3.3.1)

SEPTEMBER 17 and SEPTEMBER 19

Separation of Variables (Spherical) (3.3.2)

Multipole Expansions (3.4.1-3.4.2)

SEPTEMBER 24 and SEPTEMBER 26

Electric Field of a Dipole (3.4.2-3.4.4)

Polarization, Dielectrics(4.1.1-4.2.1)

OCTOBER 1 and OCTOBER 3

Bound Charges (4.2.1-4.2.2)

The Electric Displacement (4.2.3-4.4.1)

OCTOBER 8 and OCTOBER 10

Thanksgiving

Study Break

OCTOBER 15 and OCTOBER 17

Linear Dielectrics (4.2.3-4.4.1)

Boundary Value Problems (4.4.2-4.4.3)

OCTOBER 22 and OCTOBER 24
Energy and Forces (4.4.4)
Multipole Expansion of the Magnetic Vector Potential (5.4.3)

OCTOBER 29 and OCTOBER 31
Torques and Forces on Magnetic Dipoles (6.1.1-6.1.2,6.1.4)
Bound Currents (6.2.1-6.2.3)

NOVEMBER 5 and NOVEMBER 7
Ampere's Law in Magnetized Materials (6.3.1-6.3.3)
Linear and non-Linear Media (6.4.1-6.4.2)

NOVEMBER 12 and NOVEMBER 14
Electromotive Force and Induction (7.1.1-7.2.3)
Inductance and Maxwell's Equations (7.2.3-7.3.6)

NOVEMBER 19 and NOVEMBER 21
Charge and Energy, Poynting's Theorem (8.1.1-8.1.2) Momentum,
Maxwell's Stress Tensor (8.1.2-8.2.2)

NOVEMBER 26 and NOVEMBER 28
Angular Momentum (8.2.3-8.2.4)
Additional Material and Review Problems

ASSESSMENT:

A COMPREHENSIVE FINAL EXAM (3 hrs): 50%

MIDTERM TEST (90 minutes): 22%

4 ASSIGNMENTS (tutorial and take home work): 16% in total

3 TUTORIAL PRACTICALS/QUIZZES: 12% in total

TESTS AND EXAM:

Both the midterm and final exam will draw from lecture and tutorial materials. This could include material presented in the lectures or tutorial material that is not covered in the text. The chapters from the text that *support* the lecture material presented each week are indicated in the schedule above.

The final exam will cover all material.

NOTES:

Due dates and times will appear on the assignment handouts. Late assignments will be penalized by 50% per day. Assignments must be handed in at the tutorial on the day they are due. Assignments handed in after 5:12pm on the same day will be considered 1 day late. Anything received after 6pm the day after the tutorial is 2 days late and will not be accepted.

I expect that, in the course of doing your assignments, you will discuss them with your classmates at some level. This is fine, and a normal part of the study process. What you must not do, is copy another student's work. It is fine to discuss the problems, but when it comes to actually writing out your solutions you should do this by yourself. To copy answers from someone else is an academic offense. Plagiarism will not be tolerated. Students are expected to submit their own work for grading. Should you choose to disregard this advice, be aware that academic offenses will be turned over to the University for the determination of an appropriate penalty. I will not enjoy the process anymore than you so please don't put it to the test.

For all graded problems, in addition to any mathematical work, I expect clear written statements at each stage in the solution. Full marks will not be awarded without this. Another problem that sometimes arises is that of legibility. It takes a lot of time and effort to grade problem sets and it is very frustrating for the marker if assignments are messy and difficult to read. You will likely be more successful on your problem sets if you do what you can to not frustrate the marker. Please put some effort into ensuring that your work is clearly written and please staple the pages of your assignments together. Assignments with pages that are not stapled together may be penalized.
