Human Perspectives on Animal Intelligence

i Human Perspectives on Animal Intelligence (Instructor Eve Smeltzer)

This class will investigate animal cognition with an anthropological twist by approaching the literature from a combination of biological, psychological, and anthropological perspectives. We will discuss the impacts of historical (and continuing) anthropocentrism in animal cognition research with a particular emphasis on non-human primates. While scientists strive for objectivity, we are not impermeable to our social environment. In modern efforts to improve scientific objectivity, anthropomorphism has become taboo in the study of animal behaviour and cognition. However, the effort to remove the humanness from animals and the animalness from humans has, in many ways, resurrected the flawed *scala naturae* evolutionary ladder that places humans separate from, and above, animals. Assuming that traits are anthropomorphic to begin with (rather than mammalomorphic or primatomorphic) implies that the characteristics in question are uniquely human... but are they? To disentangle these concepts, we will focus on empirical studies of animal intelligence (e.g., tool use, communication, and social intelligence). To close the course, we will discuss how misconceptions of animal behaviour and cognition can influence our interpretations of hominin evolution.

i Please be assured that all students enrolled in a Lecture will be accommodated in a practical/tutorial. The number of practicals/tutorials currently open in some Fall/Winter courses do not accommodate all students presently enrolled in them. This is deliberate because enrolment patterns change between now and the start of the term. When the term starts, if necessary, we will open additional practicals/tutorials to accommodate the students enrolled in the course at that time.

226. [ENG69H3F](#) (2022 Fall) - Gothic Literature

i COURSE TOPIC: BAD HOUSES Gothic is a dark style in the arts, a language of terror, recognizable by its allusions to ruined castles, graveyards, sublime landscapes, and plots involving imprisonment and torture, nightmares of the unconscious mind, and monstrous deformities of the human body. If Gothic originally described a style of architecture, it was quickly transposed to the kinds of stories that took place in Gothic spaces and then to the spaces in which Gothic stories were set. These bad houses could exist in any time or place; they were bad because of what they did to the people (mostly women) who found themselves trapped inside and they were bad because of what they contained: monsters, ghosts, secrets that wouldn't stay hidden. This course tours bad houses from The Castle of Otranto to the cracked mansion in Poe's The Fall of the House of Usher; from blood-soaked Crimson Peak in del Toro's 2015 film to the xenophobic Silver House in Helen Oyeyemi's White Is for Witching. Gothic literature highlights the ways in which houses protect us, and imprison and betray us, themes that have endured from the genre's inception in the 18th century to the present.

236. [ENGD55H3F](#) (2022 Fall) - Literature, Politics, Revolution

i Course Topic: Imagining Climate Futures Climate change is our reality, but what will we do with it? Climate scientists warn us about the potentially catastrophic impacts of climate change while also telling us there is still time to change course; to move towards a just low-carbon world. Making the choices to head off the worst of climate change won't be easy. We have a relatively short amount of time to undertake major transformation. It's often hard to imagine how we get from where we are to where we need to be. That's where this course comes in. Jointly with a class from the Political Science department with the same name (students from both classes and both professors will meet together each week), we will explore the way things could be as society grapples with the climate emergency. Through both political science analysis the dynamics of climate politics and explorations of speculative climate fiction, we will explore how grounded imagination about the future can unlock potential for political change today and how it can help us navigate the changes that are underway.

i Decolonial Imaginaries This seminar will discuss both historical and contemporary anticolonial and decolonial efforts amongst artists, activists, scholars and curators to reckon with the afterlives of colonialism in visual culture. Topics will range from current theoretical debates around how art histories are taught, how colonial eras are publicly remembered or mis-remembered/silenced, what role reconciliation can play within cultural debates around heritage and visual culture, how museums that house "world" heritage perpetuate colonial visions of shared universalist histories, and what forms of artistic activism are at work today to foster broader public understandings of these histories.

773. [VPHD48H3F](#) (2022 Fall) - Advanced Seminar in Art History and Visual Culture

i Doing Art History in post-historical times This seminar examines the centrality of time in the making, viewing, and critiquing of visual arts. The 21st century, with its increasing environmental, political, and economic challenges demands a different relationship to time and its passing. How does one rethink and re-configure the questions of art history when time is no longer understood as linear, chronological, universal, or progressive? Does an artwork have its own temporal signature? Readings drawn from art history, anthropology, and critical theory address questions of nostalgia, hetero-temporalities, memory work, futurism and utopia, anachronisms, and archival afterlives.
