#### 94. [CHMB41H3F](#) (2023 Fall) - Organic Chemistry I

**LEC 02** is restricted to students who have a conflict attending any in person lectures and requires departmental approval. You may select this section but will not be officially enrolled until approved. Please contact [dpes-undergrad.uts@utoronto.ca](mailto:dpes-undergrad.uts@utoronto.ca) for approval. Check your status through ACORN to see whether you have been approved.

**(APP = approval; REF = refused; INT = no decision yet)**

**i** P = Priority, R = Restricted, A = Approval, E = Enrolment on ACORN is disabled

**i** All CHMB41H3 FALL PRACTICALS & TUTORIALS WILL BE CLOSED AS OF **3:00 pm on Friday, September 8th**

Odd Labs will start the week of Sept 11th, and even labs and tutorials will start the week of Sept 18th.

For practical changes after September 8th, please contact Shadi Dalili at [sh.dalili@utoronto.ca](mailto:sh.dalili@utoronto.ca), and for tutorial changes, please contact Nirusha Thavarajah at [Nirusha.thavarajah@utoronto.ca](mailto:Nirusha.thavarajah@utoronto.ca)

The course includes weekly tutorials and a four-hour laboratory every other week. Students are required to register for both a practical and tutorial section.

Please be assured that all students enrolled in a Lecture will be accommodated in a practical/tutorial. The number of practicals/tutorials currently open in some Fall/Winter courses does not accommodate all students presently enrolled in them. This is deliberate because

enrolment patterns change between registration dates and the start of the term. When the term starts, if necessary, we will open additional practicals/tutorials to accommodate the students enrolled in the course at that time.

### 375. [IDSC15H3F](#) (2023 Fall) - Topics in International Development Studies

**Topic for Fall 2023:** Critical Approaches to Studying Youth and Children in International Development

**Course Description:** This interdisciplinary course examines key concepts, theories, and ideas revolving around youth and children in international development. We will consider the ways in which youth and children's lived experiences are often shaped by social, political, and economic factors outside of their own control as well as the different social locations they are situated. In this course, race, gender, sex, class and disability will be relevant to explore questions of both the rights of children and youth as well as ethical responsibilities to them at the global and local levels. We will also examine how personhood has been defined historically, and the way its meanings change over time to shape the lives of children and youth. As part of this course, students will learn how the SDGS attend to the specific development issues shaping youth and children well-being and future development. This course will run as a seminar with interactive lectures, class discussions, audiovisual technologies, and case studies. Class materials will draw from research articles, social media, online resources, blogs, and print media to center the lives of youth and children situated in the context of international development.

### 383. [IDSD12H3F](#) (2023 Fall) - Topics in International Development Studies

#### **i** Topic for Fall 2023: Philanthrocapitalism and Development

**Course Description:** Over the past two decades, modes of funding international development have changed significantly. Aid and development funding has always been political, tied to the priorities of donor nations and their foreign policy objectives, as well as to the aspirations of those working within and directing the activities of development agencies. However, over the last two decades, international development has been increasingly financed and implemented by a nexus of billionaires and corporate foundations. From the Gates Foundation's 'new' green revolution in Africa, to the Clinton Foundation's engagement in the Global Fund both the capital and the goals that structure development policy and practice internationally have been structured by the interests of the wealthy and the associated tools of celebrity and corporate social responsibility. The role of the wealthy in development, however, is not a new phenomenon. The act of moral cleansing through the provision of public infrastructure and reformist social policy by 19th century robber barons and industrialists like Carnegie, the Rockefellers or the Vanderbilts in North America, presage what we see on the global stage today.

In this course, we will examine the recent rise of philanthrocapitalism, and its explicit ties to and intersections with development policy and practice. We will evaluate the political opportunities that facilitate a role for corporate capital and private wealth in development practice and consider the range of impacts that this increasing role of trans-stage wealth plays in shaping the futures of people around the globe.
