ACADEMIC INTEGRITY OFFICE
About Generative AI

"Honesty, Trust, Fairness, Responsibility, Respect, Courage"

Use of Generative AI in the Course

Please confirm with your instructor whether a technology tool such as ChatGPT is permitted to use on an assignment. Faculty at the University are aware of this technology, and encourage discussion of the limitations and potential of these tools.

The Issue

Be aware that the University expects students to complete their own work and generate ideas independently.

If your instructor prohibits the use of generative AI for assignments, then using it is considered an academic offence.

Also, be advised that generative AI sometimes generates erroneous information that can be easily spotted by your instructors.

Code of Behaviour on Academic Matters

"(b) to use or possess an unauthorized aid or aids or obtain unauthorized assistance in any academic examination or term test or in connection with any other form of academic work;"

About Generative AI

Strategies to Appropriately Harness AI

- Seek clarification from your instructors and TAs about what tools are permitted.
- Complete your research EARLY so you are not tempted to use AI tools to generate your citations and reference list.
- Use University resources to ensure it is your own work that is submitted.

Smart Strategies

Use generative AI as a learning tool!

Generate Study Guides

Use generative AI tools to prepare study plans to help manage your time efficiently, including:
- Generate practice test questions
- Explain course concepts
- Translate lecture notes

Preview Courses

When you receive your syllabus, you can use generative AI to start to preview and explore the topics and complex concepts.

Summarize Your Notes

After each lecture or reading, you can use generative AI to summarize **YOUR** notes to make more concise tip sheets and summary slides.
